# ENERGY MONITORING

IMPROVE YOUR CR360 DATA COLLECTION WITH URJANET'S AUTOMATED UTILITY DATA SERVICE

urjanet

cr360 and Urjanet partner to provide an end-to-end solution that empowers advanced data management and visualization. Urjanet Utility Data Service helps to eliminate the burden of data access, aggregation, and entry by providing a feed of accurate, timely, and complete utility data directly into cr360's industry-leading sustainability software. cr360 and Urjanet allow you to gain a more accurate understanding of your energy consumption, resulting in better, more informed decisions for your business.

MONITOR
Measure consumption, usage and costs.

REPORT
Create and share live-dashboards and export reports.

REACT
Identify areas to improve performance and energy efficiency, calculate carbon emissions, save costs.

Urjanet collates and organizes utility data into a single template, saving you from scanning and uploading individual meter invoices.

The processed data is automatically integrated into your cr360 system and merged with your organizational information.

A CLOSER LOOK AT DATA COLLECTION WITH URJANET

WHAT CAN URJANET UTILITY DATA SERVICE DO FOR ME?

Your cr360 system does not change but your data collection sources are enhanced. Urjanet's technology obtains your utility bill data and automatically delivers it into your cr360 platform.

Urjanet Utility Data Service provides an additional source of utility bill data that is obtained directly from your utility providers with automated processing. These automation tools help you to reduce manual data collection as much as possible. Having an additional, automated data source means that your data set will be more accurate and complete.

HOW DOES IT WORK?

Urjanet's technology extracts, standardizes, and delivers utility bill data from over 3,000 disparate global utility providers. The data is then transferred to cr360 to be incorporated into your cr360 platform. You can then have the data available in the same standard cr360 setting you are used to using.

KEY FEATURES AND BENEFITS

- A complete and accurate view of energy consumption
- Time savings from automating data collection and shifting time away from manual data entry
- Increasing the productivity and effectiveness of your team to focus on more strategic projects

> " Our strategic partnership helps cr360 users to quickly gain powerful, high-level insights into their energy performance, reduce energy costs where appropriate, and make strides in tackling their GHG emissions. Through cr360's platform, our data provides quantifiable value to sustainability professionals and makes their processes dramatically more efficient. "
