

## Utility Data Platform for Retail Energy

**Streamline your customer billing experience with automated access to utility bill data.**

Urjanet provides secure, user-permissioned access to customer utility account data from thousands of providers across the U.S., so you can consolidate and control the customer billing relationship.

### Drive more revenue

Owning the billing relationship enables you to sell more products and services to your existing customer base.

### Scale your business

With automated utility account access, you can expand to serve customers in new territories with the flip of a switch.

### Boost customer retention

Provide a streamlined user experience that boosts customer satisfaction and keeps your solution competitive.

## Unlock the power of global utility data access

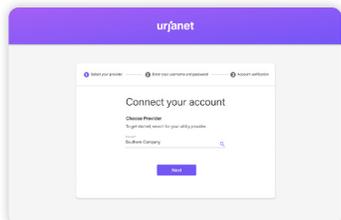

The Urjanet Utility Data Platform automatically aggregates utility data from more than 6,500 electric, natural gas, water, waste, and telecom providers in 47 countries. The complex data that we collect is standardized across providers and formatted to meet your specific needs. If we're missing a utility provider you need, we'll build the integration free of charge.

"Urjanet enables us to provide an innovative billing experience for residential customers, which is critical to staying competitive in the growing retail market."

- U.S. Energy Retailer

# How It Works

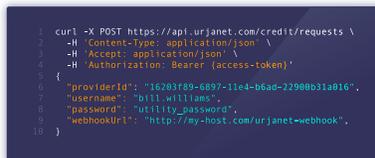

1

## Customer links accounts

Through an Urjanet-hosted web form or a customized user experience integrated with our API, your customers link their accounts.

2

## Urjanet retrieves data

Our platform connects directly to the customer's utility account to collect line-item bill data as well as the original bill PDF.

3

## Streamline your billing experience

Customers can view all of their utility bills within your application, increasing satisfaction and interaction with your business.

## Key product features

### ✓ Automated

Urjanet's platform automatically captures and delivers customer utility data, eliminating the need for manual downloads and uploads of bills.

### ✓ Timely

Bills are identified and captured by our system as soon as they are available from the utility.

### ✓ Accurate

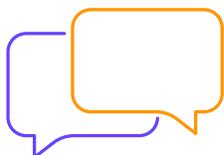

Over 150 quality audits are conducted before delivery to ensure the data is robust and trustworthy.

### ✓ Flexible

The data is configured for the data points and time periods you request.

### ✓ Secure

Industry-leading safeguards protect the security, confidentiality, and integrity of customer data.
