

A seamless invoice processing solution

urjanet

The challenge

Third-party and proprietary waste management systems lack the industry-specific software solutions that can satisfy their unique needs.

Current methods of invoice retrieval, data extraction, auditing, and reporting often require **manual data entry** and **juggling multiple systems**. This process is error-prone, time-consuming, and costly.

The solution

Urjanet automates waste invoice collection directly from haulers across the U.S., with a seamless integration into the Discovery platform.

Discovery automates invoice audits by validating charges against multiple data sources, including the current contract, deployed sensors, and work orders. Automation **makes the process 6x faster**, improves accuracy, and drives **5% savings per invoice**.

Urjanet + Discovery enable you to:

Automate tedious processes

Let us handle the plumbing of invoice downloads and audits, so your team can spend more time servicing customers and driving results.

Grow your business

Technology is more scalable than people. Grow to serve more customers and higher account volumes with ease.

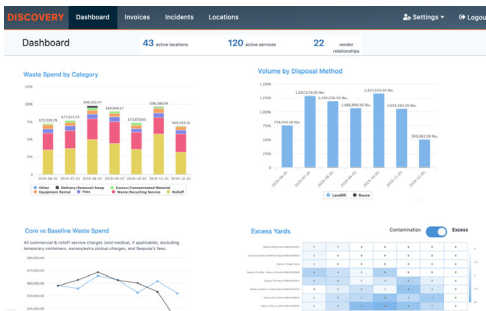

Accelerate invoice payment

With automated invoice audits, you can increase time to pay, improve accuracy of payments, and enhance your cash flow.

Key Features

Automated collection and capture

- Invoices and invoice data are automatically extracted and delivered into a reporting portal
- 100% of vendor invoice line items are audited, saving 5% per invoice
- Every 1,000 locations automated frees up two FTEs' time

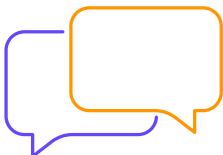

Detailed reporting & analytics

- Enables accurate sustainability reporting formatted for GRESB, ENERGY STAR Portfolio Manager®, and more
- Integrates with Quickbooks Online and other accounting systems
- Delivers a white-labeled reporting portal for your clients, detailing customer locations, incidents, deployed sensors, and invoices

A better solution for customers

- Automatically calculate and show savings generated for customers
- Track and reduce invoice error rates
- Improve customer satisfaction and retention with detailed reporting on waste spend over time
