UTILITY DATA FOR SUSTAINABILITY AND ESG REPORTING

Accelerate progress toward your sustainability goals and
simplify your environmental reporting

Utility Cloud provides commercial enterprises with automated access to data directly from thousands of utilities worldwide. Our platform accelerates the collection of utility bill data for carbon emissions reporting and eliminates error-prone manual processes.

Unlock the value of your utility data with comprehensive utility coverage

Utility Cloud automatically aggregates the utility data you need from more than 9,500 electric, natural gas, and water utilities, across 52 countries and multiple languages. The complex data that we collect is streamlined by our cloud-based, intelligent technology and formatted to meet your specific needs. If we're missing a utility provider you need, we'll build the integration free of charge.

- ✦ **Save time and resources**
Free up the time spent on manual data collection and entry from multiple sources. Collect up to 36 months of energy usage data from utility bills and interval meters.
- ✦ **Simplify measurement**
Easily track progress towards sustainability goals. Automatically receive energy consumption data every month or at your desired frequency.
- ✦ **Ensure accuracy**
Generate auditable reports with direct utility data access. Satisfy requirements for various corporate frameworks with trusted data.

Looking for more than just access to utility data? We can help.
utilitycloud@arcadia.com.

HOW IT WORKS

1

Connect your utility accounts

Link your online utility accounts through our secure interface, file upload, or via API.

2

Select your data format

Get all of your data delivered directly to you via API.

3

Collect your data

Receive historical energy usage data and ongoing data based on your desired frequency.

Key product features

Automation

Fully automated technology requires fewer resources, saves time, and eliminates errors associated with manual entry and OCR processes.

Flexibility

Utility bill data is configured to meet your requirements and adjusted for the data points and time periods requested. Original utility bill images are also available.

Timeliness

Utility bill data is captured, standardized, and delivered as soon as new bills become available.

Security

Industry-leading safeguards protect the confidentiality and integrity of customer data.

Accuracy

Gathering data directly from the source supports higher accuracy rates than OCR without human intervention.

Join us in our mission and find out how you or your business can help achieve the vision of a 100% zero-carbon future at arcadia.com. To learn more about integrating Arc solutions, contact our team at utilitycloud@arcadia.com.
